Save OUR Lakes

HALT THE SALE OF WATER FROM LAKE O'THE PINES

Scan or click to sign the petition & save our Lakes!

Preserving the water from Lake O'The Pines and Caddo Lake is essential for maintaining ecological balance and supporting the local communities that rely on these resources. These lakes are not only vital habitats for diverse wildlife and plant species, but they also play a crucial role in the local economy. Selling this water to Dallas could deplete these natural resources, negatively impacting local ecosystems, threatening biodiversity, and undermining the economic benefits that tourism brings.
